STRONG ARGUMENTS

- High-pressure blower made of aluminum
- Very high airflow
- Uses the hydraulics of the tractor
40 l/min (10.57 gpm)
- External mounting or integrated with
the Scorpion boom mowers

The Leaf Blower LG is a high-pressure blower that is hydraulically driven through the tractor's hydraulics.

It is used in conjunction with a verge mower for removing the debris left on the road. It can also be mounted on a boom arm and remove snow from solar panels.
